

- Boost responses with a batch of freephone 080 marketing numbers.
- Unify each and every caller's experience using interactive advanced call plans.
- Ensure callers never hear 'engaged' or 'dead' tone or their call rings 'unanswered'.
- Measure ROI, quantify call responses, review monthly call statistics.
- Keep your business telephone numbers for life - even if you move office.
- Promote a national image: a national service has no linked area/town location.
- As of July 2015 0800 is free to call from UK mobiles, landlines and payphones.

### Facts on National 080 Number Services

- Network operators do not apply access charges when you dial any 080 number.
- 080 numbers may work if called from abroad, however this then is not a free call.
- Since 2011, more calls and minutes are consumed by mobiles than by fixed landlines.
- Choose 0800 or 0808 (not 0500 as these end in 2017). 0300 is landline rate, not a freephone.
- Callers from landlines and mobiles or payphones pay no connection fee and £0.00 per minute.
- Owners of freephone numbers pay to receive the 'free' calls, which route through an inbound voice platform.

### Why Choose 08UK

- We're a UK company that specialises in 'inbound solutions' delivered on freephone numbers.
- Our port team have 15yrs experience seamlessly porting/moving 08 & 03 numbers from all major networks.
- Major tier 1 carriers, (BT, Virgin, Vodafone, Citrus), supplied with no monthly rentals per number or feature.
- Low rates yet no compromise on service levels, plus 30 day rolling or fixed terms.
- We have industry leading SLA's, exceeding expectations is our aim every time.
- We can help register your new 080 on to the OSIS '118' Database.
- Our annual client retention is consistently 99%.
